## NFI Survey Manual Section 3: Square Data

### 3.0 Square Data

### 3.1 Accessing the Square Data Fields

In the Forester Data Editor window, click on the Layer drop down menu and select Square.

The square boundary changes to blue and the square data fields appear in the Forester Data Editor window. The window may have to be expanded to see all the data fields. Use the mouse to click-and-drag the margins.

## NFI Survey Manual Section 3: Square Data

### 3.2 Completing the Square Data Fields

Initially there are just two data fields to complete; Visit Status and Access Status. These are shown in orange, indicating that they are mandatory. The blue data fields have been completed by the software and cannot be edited by the surveyor.

### 3.2.1 Visit Status

Table 3-1: Visit Status dropdown options

| Data Field | Options | Comments |
| :--- | :--- | :--- |
| Visit Status | - Unvisited | For office use only. |
|  | - In Progress | Square data collection is in progress but it is <br> necessary to return another time to finish the <br> data collection. |
|  | - Refused Access ${ }^{1}$. | Square data collection has been completed. |
|  | Select this option if no data has been collected <br> Select this option if any part of the square has <br> been objectively measured or visually assessed. <br> because access was denied across the entire <br> square or on the approach to the square. |  |
| assess $^{1}$ |  |  |

[^0]- Completed
- Refused Access
- Not possible to assess

## NFI Survey Manual Section 3: Square Data

### 3.2.2 Access Status

Table 3-2: Access Status dropdown options

| Data Field | Options | Comments |
| :--- | :--- | :--- |
| Access Status | - Accessible | Select this if any part of the square is <br> physically accessible. |
|  | - Inaccessible, visual <br> assessment possible | Select this if the entire square is <br> physically inaccessible but at least part <br> of it can be visually assessed (e.g. one or <br> more Sections can be visually assessed). <br> assessment possible |
| Select this if the entire square is <br> inaccessible and no part of it can be <br> visually assessed. |  |  |

Depending upon which Access Status option is chosen, a number of new orange (mandatory) data fields will appear in the Forester Data Editor window.

### 3.2.2.1 Accessible squares

The following data fields must be completed if any part of the square is physically accessible. Note that the orange mandatory data fields turn blue once completed.

| Forester Data Editor |  | - $\square$ 미 |
| :---: | :---: | :---: |
| !Layer: Square |  |  |
|  |  |  |
| 引 Copy Unsurveyed/ |  |  |
| ( - S Square 51201 |  |  |
| Field Name | Value |  |

## NFI Survey Manual Section 3: Square Data

Table 3-3: Accessible square data fields

| Data Field | Options | Comments |
| :---: | :---: | :---: |
| Peg Location | - SW <br> - NW <br> - SE <br> - NE <br> - Elsewhere <br> - No Peg | Peg the SW corner in the first instance. <br> If this is not possible, peg any other corner. <br> Where no corner is suitable, place a peg somewhere along a square boundary if possible. <br> Where a peg has not been left for whatever reason, mark the spot with a twig and biotape. |
| Peg Reason | - No Landowner Permission <br> - Health \& Safety <br> - Legal Restriction <br> - Public Access Area <br> - Residential <br> - Garden <br> - Impenetrable Surface <br> - Puddling Ground <br> - Boggy Ground <br> - Inaccessible <br> - Multiple causes <br> - Terrain <br> - Ground Vegetation <br> - Forest Operations <br> - Other | This data field only appears if the SW corner has not been pegged. Select the reason why the SW corner could not be pegged. |
| Peg GPS Location | Free text | Record the field GPS reading at the peg location, which may be different to the ArcMap derived coordinates used to navigate to. This must be 12 characters, starting with the Ordnance Survey 100 km Square letter, followed by 10 digits (e.g. SU0380004500). This data is used to help relocate the square |

## NFI Survey Manual Section 3: Square Data

| Data Field | Options | Comments |
| :---: | :---: | :---: |
|  |  | in future visits. |
| Peg Comments | Free text | Always give notes to help relocate the peg in the future (e.g. by rootplate of fallen tree, 3 m North of footpath). |
| Peg Location Origin | - Ordnance Survey <br> - Aerial Photo <br> - GPS <br> - Survey <br> - Combination | The method used to locate the peg. Order of preference is aerial photo, then Ordnance Survey map, then GPS unit/traditional survey methods. <br> OS map only used. <br> AP only used. <br> GPS only used. <br> Traditional survey methods (e.g. compass and pacing). <br> Any combination of the above. |
| Landscape Location | - Hilltop <br> - Plateau <br> - Upper Slopes <br> - Middle Slopes <br> - Lower Slopes <br> - Valley bottom <br> - Plain | How the square sits in the local landscape. Refer to the Ordnance Survey 25K Map GIS Layer. <br> A non-plateau area at the top of a hill. <br> An extensive flat area above a slope, on a hill. <br> The upper portion of any slope. <br> The middle portion of any slope. <br> The lower portion of any slope. <br> A gently sloping basin at the foot of significant hill-slopes. <br> An extensive flat area not above steep |

[^1]
## NFI Survey Manual Section 3: Square Data

| Data Field | Options | Comments |
| :---: | :---: | :---: |
|  | - Flood plain <br> - Riparian Frequently Flooded <br> - Riparian Occasionally Flooded <br> - Not Possible to Assess | slopes. <br> Area subject to flooding (at least once every 50 years) when a river bursts its banks. <br> Frequently flooded area along the banks of a natural watercourse. <br> Occasionally flooded area along the banks of a natural watercourse. <br> For office use only. |
| Distance of Square to Road | - <200m <br> - 200-400m <br> - 400-600m <br> - 600-800m <br> - $800-1000 \mathrm{~m}$ <br> - > 1000m <br> - Not Possible to Assess | Measure the distance as the crow flies from the square to the nearest road able to take a 32 ton timber lorry. Use the ArcMap "Measure" tool. <br> For office use only. |
| Mechanical Harvesting | - Wheeled vehicle on site possible <br> - Wheeled vehicle on site impossible <br> - Sky line site <br> - Mech. Harvesting Impossible <br> - Not Possible to | Harvesting operations can be carried out using a wheeled vehicle. <br> Harvesting operations cannot be carried out using a wheeled vehicle, but they can be carried out using a tracked vehicle. <br> Site is too steep for wheeled/tracked vehicles, but can be harvested using a skyline. <br> Site conditions are unsuitable for any form of mechanical harvesting. <br> For office use only. |

[^2]
## NFI Survey Manual Section 3: Square Data

| Data Field | Options | Comments |
| :--- | :--- | :--- |
| Assess | Surveyor's planned date of survey. <br> Optional data field. |  |

3.2.2.2 Inaccessible squares: visual assessment possible

The following data fields must be completed if the entire square is inaccessible but at least part of it can be visually assessed. Note that the orange mandatory data fields turn blue once completed.

[^3]
## NFI Survey Manual Section 3: Square Data

Table 3-4: I naccessible square data fields (visual assessment possible).

| Data Field | Options | Comments |
| :--- | :--- | :--- |
| Landscape Location | See Table 3-3 | Same as for accessible squares. |
| Distance of Square <br> to Road | See Table 3-3 | Same as for accessible squares. |
| Mechanical <br> Harvesting | See Table 3-3 | Same as for accessible squares. |
| Inaccessible Reason | - Inaccessible thicket | Thicket is defined as stands of <br> trees where the bases of the live <br> crowns of the trees are below <br> 1m in height, and the live <br> crowns interlock so tightly that <br> access is impossible. This <br> applies to conifers and <br> broadleaves. |
|  | - Inaccessible health and |  |
| - safety | Inaccessible due to H\&S reasons <br> (report reasons in Checkpoint <br> report) |  |
| - Inaccessible obstruction | Inaccessible due to slope (report <br> steepness and surface <br> conditions in Checkpoint report) |  |
| Inaccessible due to an |  |  |
| obstruction reasons (report |  |  |
| obstruction in Checkpoint |  |  |
| report) |  |  |

### 3.2.2.3 Inaccessible squares: NO visual assessment possible

If the entire square is inaccessible and no part of it can be visually assessed, only the "Inaccessible Reason" data field needs to be completed. See Table 3-4 above. Note that the software will not allow collection of any Section data.

[^4]
## NFI Survey Manual Section 3: Square Data

### 3.2.3 Square accessibility flowchart

Flowchart 3-1: Square Accessibility

## NFI Survey Manual Section 3: Square Data

### 3.3 Adding a Square Photo

Currently optional, but this may become mandatory in the future. Multiple photos can be taken but at least one must show the location of the peg on the ground, where possible with a distinctive feature in view to help find the peg on return visits.

Photos of other square related features e.g. pests \& diseases, obstructions etc. can be placed here with an appropriate Comment.

### 3.3.1 Resizing a photo

The NFI Forester software will only allow photos up to $\mathbf{2}$ MB in size, so it may be necessary to resize the photo. To do this:

Save the photo to the Toughbook.

Open Microsoft Picture Manager (Start> All Programs> Microsoft Office> Microsoft Office Tools> Microsoft Office Picture Manager) and double-click on the photo to open it.

In the "Getting Started" window on the right of the screen, click on "Edit pictures", then in the "Edit Pictures" window, click on "Compress pictures".

3-11 Remember to Save your Edit Session Regularly, Validate the information and Backup the Data

## NFI Survey Manual Section 3: Square Data

Make a back-up of the original photo (File> Save As...> browse to the location where the edited photo is to be saved).

In the "Compress pictures" window, experiment with the different compress options and then click the OK button.

Click on the "Save" icon at the top left of the screen to save the edited photo.
Close the Microsoft Picture Manager.

## NFI Survey Manual Section 3: Square Data

### 3.3.2 Adding a photo into Forester

Click on the [+] sign to the left of the square name in the Forester Data Editor window. Then right-click on the Photo folder and select "Add New Photo".

In the "Open Photo Dialog" window, browse to the photo and click on the "Open" button.

3-13 Remember to Save your Edit Session Regularly, Validate the information and Backup the Data

## NFI Survey Manual Section 3: Square Data

The photo will appear in the Forester Data Editor window.

3-14 Remember to Save your Edit Session Regularly, Validate the information and Backup the Data

## NFI Survey Manual Section 3: Square Data

### 3.3.3 Completing the photo data fields

Table 3-5: Square photo data fields

| Field Name | Value | Comments |
| :--- | :--- | :--- |
| Photo Date | Calendar. | Click in the white box and the <br> current date is automatically <br> entered. Click on the drop-down <br> arrow at the right of the box to <br> call up the calendar. Edit the <br> date as required. |
| Comment | Free text | Always give notes to help <br> relocate the corner peg. |
| Include in Checkout | - No | For office use only. <br> Always select this option. |
| Photo File | Yes | The photo filename is <br> automatically entered by the <br> software. |

Here is a completed example.

3-15 Remember to Save your Edit Session Regularly, Validate the information and Backup the Data

[^0]:    ${ }^{1}$ Before a Square is checked back in it must have a Visit Status of either:
