

P ramorum symptoms in Rhododendron

Phytophthora ramorum* symptoms in *Rhododendron ponticum

- Wilt and dieback of fresh growth
- Shoot dieback extending down from growing tip often giving a "crook" effect
- Dieback extending from the stem of leaf down the midrib and also on the leaf tip, ie wherever water collects
- Watery appearance to dieback. On the underside of the leaf infection tends to follow the cell structure and does not have a clearly defined edge
