2) Lack of adequate governance frameworks

- Establish appropriate governance frameworks to facilitate development of woodlands for water PES schemes; role for EU institutions, national governments, water regulators and land managers (in partnership with other stakeholder groups).
- Create a partnership to consider establishing a Woodland Water Code to underpin development of future woodlands for water schemes (e.g. along similar lines to the UK Woodland Carbon Code www.woodlandcarboncode.org.uk): role for governments, investors, water regulators and land managers.
