

The PESFOR-W virtual field tour

The riparian zone - Where the water quality is formed

Can planting trees improve water quality?

COST is supported by
the EU Framework programme
Horizon 2020

Nancy – France

March - 2017

First stop on our 4-year tour was Nancy, France. In close contact with water we discussed the on-going PES scheme at Vittel.

Opatija – Croatia

October - 2017

Out side Opatija studying tree planting
along a small river.

Opatija – Croatia

October - 2017

Apart from water issues we also had the chance to explore the wonders of the soil!

Castelfranco – Italy

March - 2018

Early spring in Northern Italy:

- Padua water supply
- Well restoration
- Increased infiltration

Castelfranco – Italy

March - 2018

Restoring springs in the Po valley plain

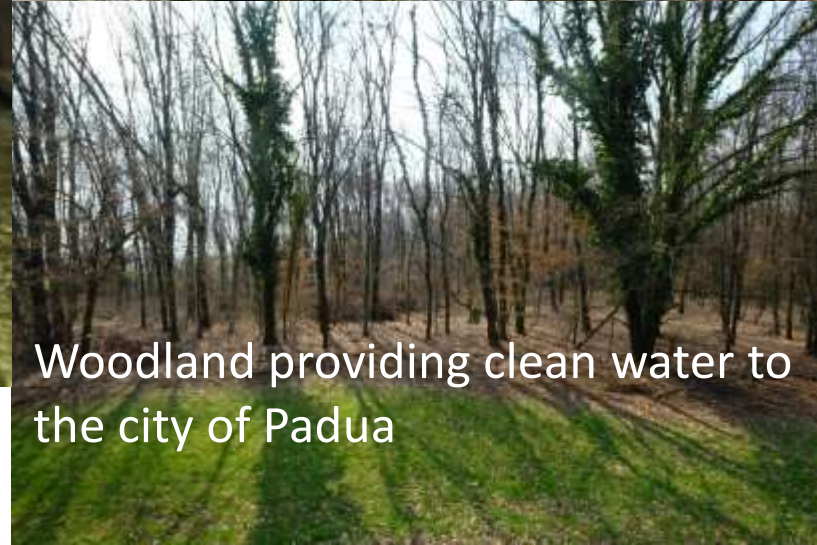

Castelfranco – Italy

March - 2018

the EU Framework programme
Horizon 2020

A wide-angle photograph of a sunset over a body of water, likely the Adriatic. The sky is filled with dark, heavy clouds, but a bright, intense red and orange glow from the setting sun illuminates the clouds and the water's surface. The water is dark, with the red light reflecting off it. In the distance, dark silhouettes of mountains or hills are visible against the horizon. The overall mood is somber and dramatic.

The END

Sunset in the Adriatic's – colours due to forest fires in Portugal
