

Strathard: A landscape to live, work and play

"I like looking for rare birds when I go for walks in the woods"

Nature provides habitats for rare and iconic birds and animals.

Broadleaf forest

"I think climate change has increased flooding"

Nature can slow rain water coming off the land to reduce flooding.

Wetland peatland and bog

"I love the pure air"

Nature regulates air quality by absorbing pollution.

Coniferous forests

"The local history is so interesting, it gives me inspiration for my projects"

Nature and the landscape is a source of inspiration for artists and writers.

Heathland and moorland

"Water quality is really important to me as I don't have access to the mains supply"

Nature naturally filters water making it cleaner and cheaper to process.

Rivers and lochs

"My farm has been in the family for generations"

Nature provides food and supports livelihoods and local businesses.

Grasslands

What can nature do for us?
