Comments (if any):												

**2 Please comment on any quotas, incentives, disincentives, tariff/non-tariff barriers or other related factors which now or in future will significantly affect your production and trade of tropical timber products.**

**3 Please elaborate on any short or medium term plans for expanding capacity for (further) processing of tropical timber products in your country.**

**4 Please indicate any trends or changes expected in the species composition of your trade. How important are lesser-used tropical timber species and/or minor tropical forest products?**

**5 Please indicate trends in domestic building activity, housing starts, mortgage/interest rates, substitution of non-tropical wood and/or non-wood products for tropical timbers, and any other domestic factors having a significant impact on tropical timber consumption in your country.**

**6 Please indicate the extent of foreign involvement in your timber sector (e.g. number and nationalities of concessionaires/mill (joint) owners, area of forest allocated, scale of investment, etc.).**

**7 Please provide details of any relevant forest law enforcement activities (e.g. legislation, fines, arrests, etc.) in your country in the past year.**

**8 Please indicate the current extent of forest plantations in your country (ha), annual establishment rate (ha/yr) and proportion of industrial roundwood production from plantations.**

#### Notes:

The term "ex" means that there is not a complete correlation between the two codes and that only a part of the HS96/HS2002 or SITC Rev.3 code is applicable.

For instance "ex 44.03.99" under product 1.2.NC.T means that only a part of HS96/HS2002 code 44.03.99 refers to tropical industrial roundwood. Many tropical timber products contain "ex" codes in the above list as the Harmonized System of customs classification explicitly recognizes less than 100 tropical timber species. Species not explicitly recognized as tropical in the HS are grouped in "others" categories with non-tropical, non-coniferous timbers that are likewise not explicitly recognized by the HS (e.g. 44.07.99). Estimates of tropical timber trade totals therefore require that these "others" categories be analyzed to ascertain how much of the total was sourced from tropical countries.

In HS96/HS2002, 0 in the final (fourth or sixth) position means that all sub-headings are included: 44.08.30 includes 44.08.31 and 44.08.39.

In SITC Rev.3, if only 4 digits are shown, then all sub-headings at lower degrees of aggregation are included: 634.1 includes 634.11 and 634.12

## Notes:

The term "ex" means that there is not a complete correlation between the two codes and that only a part of the HS96/HS2002 or SITC Rev.3 code is applicable.

For instance "ex 811.00" under "Prefabricated buildings - of which made of wood" means that only a part of SITC code 811.00 refers to buildings prefabricated from wood, as that code does not distinguish between the materials buildings were prefabricated from.

In HS96/HS2002, 0 in the final (fourth or sixth) position means that all sub-headings are included: 49.00 includes all positions from 49.01 to 49.11.

In SITC Rev.3, if only 4 digits are shown, then all subheadings at lower degrees of aggregation are included: 892.2 includes 892.21 and 892.29
