National Statistics status

National Statistics status means that our statistics meet the highest standards of trustworthiness, quality, and public value, and it is our responsibility to maintain compliance with these standards.

The continued designation of these statistics as National Statistics was confirmed in March 2020 following a [compliance check by the Office for Statistics Regulation](#). The statistics last underwent a [full assessment against the Code of Practice in 2012](#).

Since the latest review by the Office for Statistics Regulation, we have continued to comply with the Code of Practice for Statistics, and have made the following improvements:

- Introducing a new quality assurance of administrative data report to provide further details on the data sources used in this release.
- Enhancing trustworthiness by reducing pre-release access.
- Including last update/review dates in supporting documents and indicating expected dates of next updates/review, to provide reassurance to users that documents remain relevant.
- The introduction of a new small roundwood price index and 2 new sub-indices of the softwood sawlog price index, to cover spruces and other conifers.

Introduction

This release contains the latest figures for the Coniferous Standing Sales Price Index, the Softwood Sawlog Price Index and the Small Roundwood Price Index for Great Britain. Each is based on sales to 30 September 2022 by Forestry England, Forestry and Land Scotland and Natural Resources Wales. The release also includes two sub-indices of the Softwood Sawlog index, covering spruces and other conifers.

Data for the period to 30 September 2022 is provided for the first time in this release. Information on revisions to earlier data are provided in the Annex.

The Coniferous Standing Sales Price Index monitors changes in the average price received per cubic metre overbark for timber that Forestry England, Forestry and Land Scotland and Natural Resources Wales sold standing, where the purchaser is responsible for harvesting.

The Softwood Sawlog Price Index monitors changes in the average price received per cubic metre of sawlogs (roundwood with a top diameter of 14 cm or more, likely to be sawn into planks or boards) sold at roadside by Forestry England, Forestry and Land Scotland and Natural Resources Wales.

The Small Roundwood Price Index monitors changes in the average price received per cubic metre for roundwood that is smaller in diameter than sawlogs. This includes chipwood, pulpwood and woodfuel. It is based on sales at roadside and covers sales by Forestry England, Forestry and Land Scotland and Natural Resource Wales.

Standing timber, sawlogs and small roundwood are distinct markets and may show different price movements. The data are averages for historic periods, so may be slow to show any true turning points.

These indices are used to monitor trends in timber prices and to provide information on the state of the UK timber industry. They are also used by the UK

timber industry, alongside other economic indicators, in contract reviews. Please refer to the Annex for a glossary of terms used in this release.

Key findings

The main findings are:

In the Coniferous Standing Sales Price Index:

- The index was 6.2% lower in real terms (3.5% lower in nominal terms) in the year to September 2022 compared with the previous year.
- The average price for coniferous standing sales was £38.81 per cubic metre overbark standing in nominal terms in the year to September 2022, a decrease from £40.12 in the year to September 2021.

In the Softwood Sawlog Price Index:

- The Softwood Sawlog Price Index was 18.6% lower in real terms (15.3% lower in nominal terms) in the 6 months to September 2022, compared with the corresponding period in the previous year.
- The average price for softwood sawlog sales was £67.25 per cubic metre overbark in nominal terms in the 6-month period to September 2022, a decrease from £79.39 in the 6 months to September 2022.
- The Spruce Sawlog Price Index and Other Conifer Sawlog Price Index were 16.8% and 22.8% lower, respectively, in real terms in the 6 months to September 2022, compared with the corresponding period of the previous year.

In the Small Roundwood Price Index:

- The Small Roundwood Price Index was 12.9% higher in real terms (17.4% higher in nominal terms) in the 6 months to September 2022, compared with the corresponding period of the previous year.

- The average price for small roundwood sales was £44.51 per cubic metre overbark in nominal terms in the 6-month period to September 2022, an increase from £37.92 in the 6 months to September 2021.

Coniferous Standing Sales Price Index

The Coniferous Standing Sales Price Index monitors changes in the price per cubic metre for timber that Forestry England, Forestry and Land Scotland and Natural Resources Wales sold standing, where the purchaser is responsible for harvesting.

The index is adjusted for timber size mix using the Fisher method with 5 yearly chain linking; this method was introduced from 2008. Further information on the methodology used to construct the index is provided in the Annex.

The index is shown in nominal terms (the actual prices at the time of sale) and in real terms (removing the effects of general inflation).

The Coniferous Standing Sales Price Index for Great Britain was 6.2% lower in real terms (3.5% lower in nominal terms) in the year to September 2022, compared with the previous year (Table 1).

Table 1: Percentage change in Coniferous Standing Sales Price Index¹, Great Britain, 2002 to 2022

	Nominal Terms (% change)	Real Terms (% change)
Change from previous year		
Year to September 2018	46.2%	43.8%
Year to September 2019	0.1%	-1.9%
Year to September 2020	-14.9%	-19.4%
Year to September 2021	51.8%	50.3%
Year to September 2022	-3.5%	-6.2%
Changes over longer periods, up to year to September 2022		
5 Years	82.2%	60.3%
10 Years	161.8%	113.2%
20 Years	444.9%	249.8%

Note:

1. Coniferous Standing Sales Price Index is constructed using a Fisher Index with five-yearly chain-linking.
2. Excludes sales by Natural Resources Wales between April 2017 and March 2021.
3. Standing sales prices in Scotland exclude any premature felling and/or components directly linked to retained product agreements on Long Term Contracts.

Figure 1: Coniferous Standing Sales Price Index¹, Great Britain, 1986 to 2022

Note:

1. Coniferous Standing Sales Price Index is constructed using a Fisher Index with five-yearly chain-linking.
2. Excludes sales by Natural Resources Wales between April 2017 and March 2021.
3. Standing sales prices in Scotland exclude any premature felling and/or components directly linked to retained product agreements on Long Term Contracts.

The average price for coniferous standing sales was £38.81 per cubic metre overbark standing in nominal terms in the year to September 2022 (Table 2), a decrease from £40.12 in the year to September 2021.

Table 2: Average prices and Coniferous Standing Sales Price Index¹, Great Britain, 2017 to 2022

Year to:	Average price in nominal terms (£ per m ³ over bark)	Average price in real terms (2021 prices, £ per m ³ over bark)	Index in nominal terms (Sep 2021=100)	Index in real terms (2021 prices, Sep 2021=100)
30-Sep-17	20.74	22.94	52.9	58.5
31-Mar-18	24.64	27.04	62.6	68.6
30-Sep-18	30.26	32.91	77.4	84.2
31-Mar-19	31.66	34.12	80.9	87.2
30-Sep-19	30.87	32.91	77.5	82.6
31-Mar-20	28.22	29.64	70.2	73.8
30-Sep-20	26.78	27.04	65.9	66.5
31-Mar-21	31.03	30.64	75.8	74.8
30-Sep-21	40.12	40.12	100.0	100.0
31-Mar-22	42.55	42.21	105.1	104.3
30-Sep-22	38.81	37.75	96.5	93.8

Note:

1. Coniferous Standing Sales Price Index is constructed using a Fisher Index with five-yearly chain-linking.
2. Excludes sales by Natural Resources Wales between April 2017 and March 2021.
3. Standing sales prices in Scotland exclude any premature felling and/or components directly linked to retained product agreements on Long Term Contracts.
4. See the [Timber Price Indices page](#) on the Forest Research website for accompanying tables, providing longer time series of this index and the underlying data used to produce it.

Softwood Sawlog Price Index

The Softwood Sawlog Price Index measures the average price received per cubic metre of sawlogs sold at roadside by Forestry England/Forestry and Land Scotland/Natural Resources Wales.

Sawlogs are logs (roundwood) usually of at least 14 cm diameter that are likely to be sawn into planks or boards. Selling at roadside means that the owner (in this case Forestry England, Forestry and Land Scotland or Natural Resources Wales), is responsible for felling the trees and extracting them to the side of the road so that they are ready for the buyer to take away.

The index is not adjusted for any changes in the size mix, as it covers a more limited range of sizes than the Coniferous Standing Sales Price Index.

The Softwood Sawlog Price Index is calculated for separate (i.e., non-overlapping) six-month periods. This differs from the Coniferous Standing Sales Price Index, which is for overlapping one-year periods, so the percentage changes in Tables 1 and 3 are calculated over different periods.

The index is shown in nominal terms (the actual prices at the time of sale) and in real terms (removing the effects of general inflation).

The Softwood Sawlog Price Index was 18.6% lower in real terms (and 15.3% lower in nominal terms) in the 6 months to September 2022, compared with the corresponding period of the previous year (Table 3).

Table 3: Percentage change in Softwood Sawlog Price Index, Great Britain, 2012 to 2022

	Nominal Terms (% change)	Real Terms (% change)
Compared with corresponding 6-month period of previous year		
6 months to September 2018	30.0%	27.7%
6 months to September 2019	-5.9%	-8.0%
6 months to September 2020	-6.1%	-13.2%
6 months to September 2021	59.5%	63.7%
6 months to September 2022	-15.3%	-18.6%
Changes over longer periods, up to 6 months ending September 2022		
5 Years	55.1%	35.9%
10 Years	98.4%	60.9%

Notes:

1. Excludes sales by Natural Resources Wales between April 2017 and September 2021.
2. The index excludes sawlogs put up for sale that were not sold.
3. Sawlog prices in Scotland in the six months to September 2020 include a number of sales of logs felled under Statutory Plant Health Notice; this has reduced the overall average log price.

Figure 2: Softwood Sawlog Price Index, Great Britain, 2012 to 2022

Notes:

1. Excludes sales by Natural Resources Wales between April 2017 and September 2021.
2. The index excludes sawlogs put up for sale that were not sold.
3. Sawlog prices in Scotland in the six months to September 2020 include a number of sales of logs felled under Statutory Plant Health Notice; this has reduced the overall average log price.
4. There was an unusually high number of unsold lots in Scotland in the six months to September 2015.

The average price for softwood sawlog sales was £67.25 per cubic metre overbark (felled volume) in nominal terms in the 6-month period to September 2022 (Table 4), a decrease from £79.39 in the 6 months to September 2021.

Table 4: Average prices and Softwood Sawlog Price Index, Great Britain, 2017 to 2022

6 months to:	Average price in nominal terms (£ per m ³ over bark)	Average price in real terms (2021 prices, £ per m ³ over bark)	Index in nominal terms (Sep 2021=100)	Index in real terms (2021 prices, Sep 2021=100)
30-Sep-17	43.35	47.57	54.6	59.9
31-Mar-18	51.73	56.18	65.2	70.8
30-Sep-18	56.39	60.77	71.0	76.5
31-Mar-19	65.42	69.79	82.4	87.9
30-Sep-19	53.01	55.90	66.8	70.4
31-Mar-20	55.42	57.41	69.8	72.3
30-Sep-20	49.76	48.52	62.7	61.1
31-Mar-21	67.70	67.01	85.3	84.4
30-Sep-21	79.39	79.39	100.0	100.0
31-Mar-22	76.89	74.90	96.8	94.3
30-Sep-22	67.25	64.65	84.7	81.4

Note:

1. Excludes sales by Natural Resources Wales between April 2017 and September 2021.
2. The index excludes sawlogs put up for sale that were not sold.
3. There was an unusually high number of unsold lots in Scotland in the six months to September 2015.
4. Sawlog prices in Scotland in the six months to September 2020 include a number of sales of logs felled under Statutory Plant Health Notice; this has reduced the overall average log price.

Table 5 shows the percentage changes to the two sub-indices of the Softwood Sawlog Index. Compared with the corresponding 6-month period of the previous year, both the spruce and the other conifer sawlog price indices have reported real terms decreases of 16.8% for spruces and 22.8% for other conifers.

Table 5: Percentage change in the Spruce Sawlog Price Index and the Other Conifer Sawlog Price Index, Great Britain, 2017 to 2022

	Spruces Nominal terms (% change)	Spruces Real terms (% change)	Other Conifers Nominal terms (% change)	Other Conifers Real terms (% change)
Compared with corresponding 6-month period of previous year				
September 2018	30.1%	27.7%	20.8%	18.6%
September 2019	-11.6%	-13.5%	8.7%	6.4%
September 2020	5.6%	-2.3%	-11.6%	-18.3%
September 2021	43.3%	46.8%	67.5%	71.8%
September 2022	-13.5%	-16.8%	-19.7%	-22.8%
Changes over longer periods, up to 6 months ending September 2022				
5 Years	50.4%	31.9%	56.2%	36.9%

Note:

1. Excludes sales by Natural Resources Wales up to September 2021.
2. The index excludes sawlogs put up for sale that were not sold.
3. Sawlog prices in Scotland in the six months to September 2020 include a number of sales of logs felled under Statutory Plant Health Notice; this has reduced the overall average log price.

Figure 3 presents the two sub-indices of the Softwood Sawlog Price Index for Great Britain in real terms. The index for spruces follows the Softwood Sawlog Index more closely, as spruces constitute the majority of softwood sawlog sales.

Figure 3: Spruce Sawlog Price and Other Conifer Sawlog Price Indices in real terms, Great Britain, 2016 to 2022

Note:

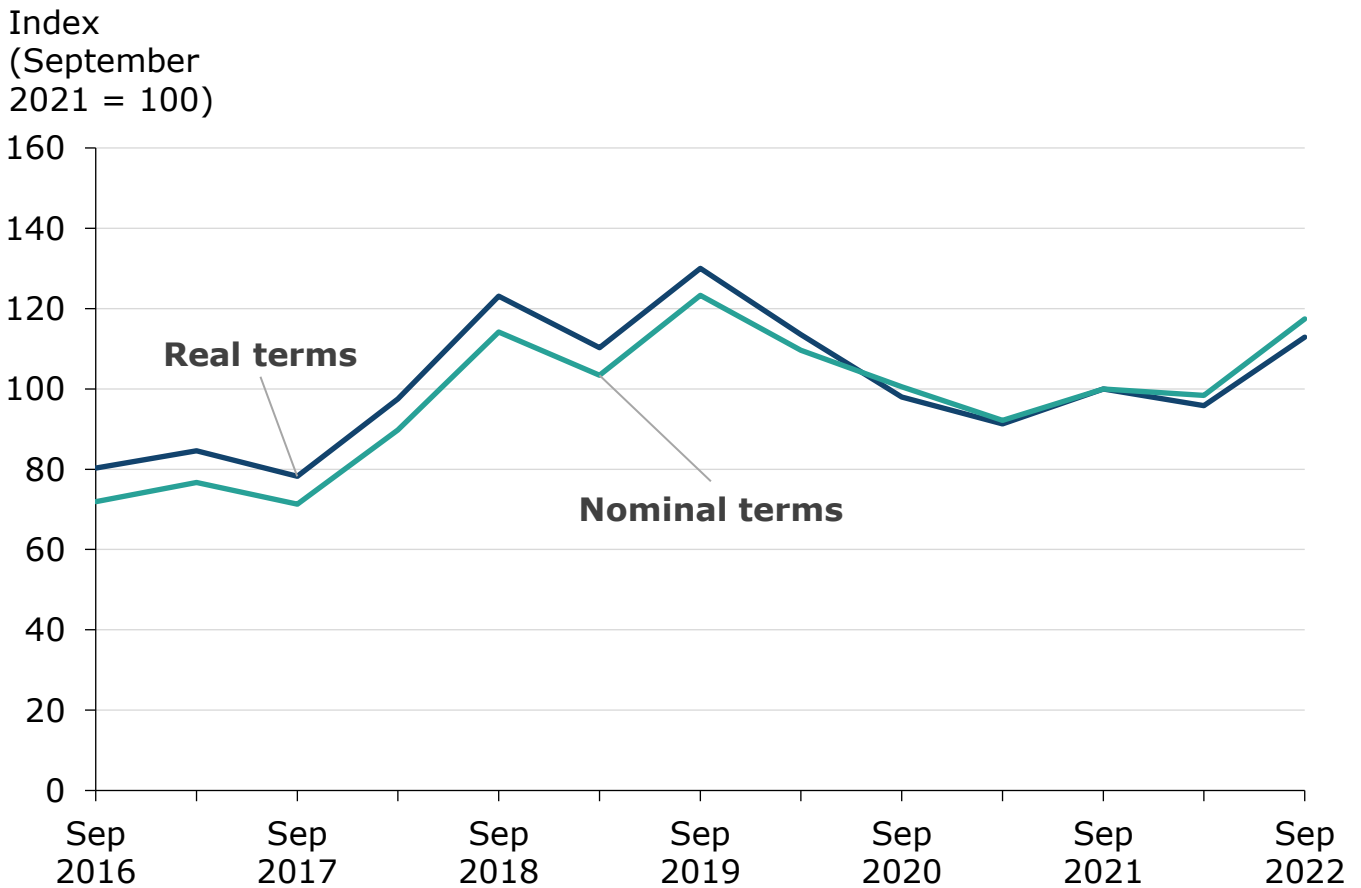

1. Excludes sales by Natural Resources Wales up to September 2021.
2. The index excludes sawlogs put up for sale that were not sold.
3. Sawlog prices in Scotland in the six months to September 2020 include a number of sales of logs felled under Statutory Plant Health Notice; this has reduced the overall average log price.

Small Roundwood Price Index

The Small Roundwood Price Index monitors changes in the average price received per cubic metre for roundwood that is smaller in diameter than sawlogs. This includes chipwood, pulpwood and woodfuel. It is based on sales at roadside and covers sales by Forestry England, Forestry and Land Scotland and Natural Resource Wales.

The Small Roundwood Price Index was 12.9% higher in real terms (and 17.4% higher in nominal terms) in the 6 months to September 2022, compared with the corresponding period of the previous year (Table 6).

Figure 4: Small Roundwood Price Index, Great Britain, 2016 to 2022

Note:

1. Excludes sales by Natural Resources Wales to September 2021.

Table 6: Percentage change in Small Roundwood Price Index, Great Britain, 2017 to 2022

	Nominal Terms (% change)	Real Terms (% change)
Compared with corresponding 6-month period of previous year		
September 2018	60.2%	57.3%
September 2019	8.0%	5.6%
September 2020	-18.5%	-24.6%
September 2021	-0.5%	2.1%
September 2022	17.4%	12.9%
Changes over longer periods, up to 6 months ending September 2022		
5 Years	64.7%	44.3%

Note:

1. Excludes sales by Natural Resources Wales to September 2021.

The average price for small roundwood sales was £44.51 per cubic metre overbark in nominal terms in the 6-month period to September 2022, in increase from £37.92 in the 6 months to September 2021 (Table 7).

Table 7: Average prices and Small Roundwood Price Index, Great Britain, 2017 to 2022

Year to:	Average price in nominal terms (£ per m ³ over bark)	Average price in real terms (2021 prices, £ per m ³ over bark)	Index in nominal terms (Sep 2021=100)	Index in real terms (2021 prices, Sep 2021=100)
30-Sep-17	27.04	29.67	71.3	78.2
31-Mar-18	34.07	37.00	89.8	97.5
30-Sep-18	43.30	46.66	114.2	123.1
31-Mar-19	39.22	41.84	103.4	110.3
30-Sep-19	46.74	49.29	123.3	130.0
31-Mar-20	41.57	43.06	109.6	113.5
30-Sep-20	38.10	37.15	100.5	98.0
31-Mar-21	34.95	34.59	92.2	91.3
30-Sep-21	37.92	37.92	100.0	100.0
31-Mar-22	37.30	36.33	98.4	95.9
30-Sep-22	44.51	42.79	117.4	112.9

Note:

1. Excludes sales by Natural Resources Wales to September 2021.

Annex

Introduction

This annex provides background information on the Coniferous Standing Sales Price Index, the Softwood Sawlog Price Index and sub-indices, and the Small Roundwood Price Index. It includes a glossary and covers the data sources and methodology used to construct the indices, information on quality measures and on revisions to historic data and links to further information.

Glossary

Broadleaves

Trees that do not have needles or cones, such as oak, birch and beech. A few, such as alder, have cone-like structures for their seeds which are not true cones.

Clearfell areas

Sites where all trees have been felled at once. In non-clearfell areas, only some of the trees are felled at any one time.

Conifers

Trees with needles and cones, such as spruce, pine and larch.

Direct production

Timber that is sold after the trees have been felled by the woodland owner or their contractors.

Forest Research (FR)

The Forestry Commission agency responsible for forestry and tree related research (including statistics).

Forestry and Land Scotland (FLS)

The Scottish Government agency responsible for managing the national forests and lands in Scotland, created on 1 April 2019.

Forestry Commission (FC)

The government department responsible for forestry matters in England. The Forestry Commission's functions in Wales transferred to the Welsh Government and to Natural Resources Wales on 1 April 2013. The Forestry Commission's functions in Scotland transferred to Scottish Forestry and to Forestry and Land Scotland on 1 April 2019. The Forestry Commission is supported by two agencies; Forestry England and Forest Research.

Forestry England

The Forestry Commission agency responsible for managing the nation's forests in England.

GDP deflator

Gross Domestic Product at market prices deflator. Gross Domestic Product (GDP) is a measure of the total economic activity. Growth in GDP reflects both growth in the economy and price change (inflation). Applying a GDP deflator to time series of prices or price indices removes the effects of inflation to enable a comparison of changes in price that are not caused by inflation.

Great Britain (GB)

England, Wales and Scotland.

Hardwood

The wood of broadleaved trees, such as oak, birch and beech; a term sometimes used for the broadleaved trees themselves.

Long term contracts (LTC)

Long term contracts are sales of roundwood, felled or standing, to customers over a period of more than one year. The second and subsequent years of a long term contract are negotiated after the sale of the first year's volume.

Natural Resources Wales (NRW)

The organisation responsible for advising the Welsh Government on the environment, created on 1 April 2013.

Nominal terms

Refers to prices at the time of sale. See also "real terms".

ONS

Office for National Statistics.

Overbark

The volume of wood including the bark. Can be either standing volume or felled volume.

Price index

A measure of the proportionate, or percentage, changes in a set of prices over time. Commonly used price indices include the Laspeyres index, Paasche index and Fisher index.

Real terms

Refers to prices at a common date. Prices in real terms are derived by applying a deflator to remove the effects of general inflation to enable a comparison of changes over time that have not resulted from inflation. See also "nominal terms".

Roadside sales

Sales of timber after harvesting. The owner is responsible for getting the trees felled and extracting them to the side of the road, ready to take away.

Roundwood

Trunk or branch wood, generally with a top diameter of 7 cm or more. Can be in the form of logs (14 cm top diameter or more) or small roundwood (7 to 14 cm).

Sawlogs

Material of at least 14 cm top diameter that is likely to be sawn into planks or boards.

Small Roundwood

Material of 7-14cm top diameter. Main uses include the production of woodbased panels, paper, round fencing and for woodfuel.

Softwood

The wood of coniferous trees, such as spruce, pine and larch; a term sometimes used for the coniferous trees themselves.

Standing sales

Sales of timber whilst the trees are still standing. The buyer is responsible for getting the trees felled and removed from the site.

Standing volume

Measurement of quantity before trees are felled. Usually expressed as cubic metres overbark standing.

Thinning

A proportion of stems removed in order to give the best stems space and light to grow into a more valuable crop. This is usually carried out some time after canopy closure and may be repeated at intervals. It is a necessary operation in the production of quality timber. A temporary reduction in standing volume will result.

Underbark

The volume of wood excluding the bark.

Data Sources and Methodology

Data sources

The Coniferous Standing Sales Price Index and the Softwood Sawlog Price Index (and sub-indices) are both based on sales of softwood (conifers) by Forestry England, Forestry and Land Scotland and Natural Resources Wales; they do not include any private sector data. They only cover roundwood from woodland; they do not cover sawmill products or other end products. The Small Roundwood Price Index is also based on roundwood sales by Forestry England, Forestry and Land Scotland and Natural Resources Wales, but can include hardwood (broadleaves) as well as softwood.

The Coniferous Standing Sales Price Index (CSSPI) is based on administrative data for standing sales of conifers (softwood) by Forestry England/Forestry and Land Scotland/Natural Resources Wales. Around 60% of Forestry England/Forestry and Land Scotland/Natural Resources Wales softwood is sold standing, with the purchaser responsible for harvesting. The standing sales cover a full range of sizes, as they include thinning and removal of trees for environmental reasons, as well as harvesting of mature trees. The data used to compile the index covers volumes sold and values by average tree size.

The Softwood Sawlog Price Index (SSPI) is based on administrative data for sales of softwood sawlogs by Forestry England/Forestry and Land Scotland/Natural Resources Wales. The data used to compile the index covers volumes and values. Direct production by Forestry England/Forestry and Land Scotland/Natural Resources Wales (where the softwood is sold after harvesting) also covers a range of sizes, but the price statistics reported are limited to sales of logs (over 14 cm diameter).

The Coniferous Standing Sales Price Index, the Softwood Sawlog Price Index (and sub-indices) and the Small Roundwood Price Index include sales by long term contract, where the volume of roundwood covered by the contract is sold over a

period of more than one year. To take account of changes in price over the term of the contract, price adjustments are made periodically, as part of the contract. The Coniferous Standing Sales Price Index and the Softwood Sawlog Price Index include roundwood sales by long term contract but, at present, price adjustments are not fully accounted for in the indices.

The data for the indices are obtained from Forestry England's and Forestry and Land Scotland's Sales Recording Packages (SRP). SRP was also used by Natural Resources Wales until February 2017. The indices exclude sales by Natural Resources Wales from April 2017 to March 2021 (for coniferous standing sales) and from April 2017 to September 2021 (for sales of sawlogs). For the 2 softwood sawlog sub-indices (spruce and other conifers) and for the small roundwood index, no data is available before October 2021.

Further information on the data sources used are available in the Quality Assurance of Administrative Data report on timber sales data.

Methodology for Coniferous Standing Sales Price Index

The Coniferous Standing Sales Price Index (CSSPI) is an index of the average prices per cubic metre overbark standing achieved for standing sales of conifers by Forestry England/Forestry and Land Scotland/Natural Resources Wales. It covers all conifer standing sales (open market and negotiated) by Forestry England/Forestry and Land Scotland/Natural Resources Wales over the twelve-month period. All thinning and clearfell data is combined within the index. It includes all species, tree sizes, working practices and conditions. It does not include any private sector data.

The Coniferous Standing Sales Price Index (CSSPI) is calculated using a Fisher index with 5-yearly chain linking. By using a Fisher index, distortions in the average price caused by variations in the average tree size over time are corrected.

Applying chain linking at regular intervals (in this case, every 5 years) ensures that the index remains relevant over time. Other factors that may affect price (e.g.,

working conditions, timber quality or species) are not taken into account when constructing the index.

The methodology used to calculate the Coniferous Standing Sales Price Index was reviewed in 2008, with the Fisher index with 5-yearly chain linking introduced from the November 2008 publication. Further information on the methodology used to calculate the Coniferous Standing Sales Price Index is provided in the paper [Methodology for the Coniferous Standing Sales Price Index](#), available from the [Statistical Methodology and Outputs page](#) on the Forest Research website.

The average prices and the index are expressed in nominal terms (i.e., the actual prices at the time of sale) and in real terms (i.e., the prices converted to 2021). The GDP (Gross Domestic Product at market prices) deflator, produced by the Office for National Statistics (ONS), is applied to the nominal figures to derive real average prices and the index in real terms. The GDP deflator data can be downloaded from the [ONS Quarterly National Accounts](#).

Methodology for Softwood Sawlog Price Index

The Softwood Sawlog Price Index is calculated from data covering separate 6-month periods to September and March. This means that the changes reported are not covering the same periods as the Coniferous Standing Sales Price Index.

The index measures the average price per cubic metre overbark of sawlog sales, with no adjustment for any change in size mix, as it covers a more limited range of sizes than the Coniferous Standing Sales Price Index. All lengths of log are included.

The index is expressed in nominal terms (i.e., based on the actual prices at the time of sale) and in real terms (i.e., based on the prices converted to 2021 prices, by removing the effects of general inflation). As for the Coniferous Standing Sales Price Index, the GDP (Gross Domestic Product at market prices) deflator is used to convert from nominal to real terms.

For consistency with the Coniferous Standing Sales Price Index, the Softwood Sawlog Price Index is rebased every 5 years; in this release, the period to September 2021 = 100.

The 2 sub-indices of the Softwood Sawlog Price Index, covering spruces and other conifers, are produced using the same methodology as is used for the main sawlog index.

Methodology for Small Roundwood Price Index

The Small Roundwood Price Index is calculated from data covering separate 6-month periods to September and March, similar to the Softwood Sawlog Price Index. The index measures the average price per cubic metre overbark of small roundwood sales.

The index is expressed in nominal terms (i.e., based on the actual prices at the time of sale) and in real terms (i.e., based on the prices converted to 2021 prices, by removing the effects of general inflation). As for other indices, the GDP (Gross Domestic Product at market prices) deflator is used to convert from nominal to real terms.

For consistency with other indices, the Small Roundwood Price Index is rebased every 5 years; in this release, the period to September 2021 = 100.

Quality

These are the only official statistics published for roundwood timber prices in the UK. So, although they are limited to sales by Forestry England, Forestry and Land Scotland and Natural Resources Wales, they are sometimes used as indicators of price trends for other UK softwood. In recent years, softwood has accounted for more than 90% of all timber harvested in Great Britain, and Forestry England/Forestry and Land Scotland/Natural Resources Wales have accounted for around 40% to 50% of all softwood sold.

For the Coniferous Standing Sales Price Index, data cover a 12-month period (i.e. data for the year to March and data for the year to September). As these periods overlap, comparisons of values should be made with the same period a year earlier. Unlike the Coniferous Standing Sales Price Index, the Softwood Sawlog Price Index (and sub-indices) and the Small Roundwood Price Index cover 6 month periods (i.e. data for the period October to March and data for the period April to September), so there is no overlapping.

Detailed information on the quality of the statistics presented in this publication is available in the [Quality Report](#).

Further quality information is available on our [Official Statistics page](#).

Revisions

Figures for the period to September 2022 are published for the first time in this release.

Figures for earlier periods have been previously published but may be revised to reflect late updates to administrative systems or to correct errors. Previous real terms figures may be subject to minor changes depending on revisions to the ONS's GDP deflator.

Averages prices for periods to March 2022 in nominal terms have not been revised since the May 2022 edition of this release.

Revisions to the GDP deflator have resulted in changes to real terms average prices and real terms indices of up to 1.2% for standing sales and 1.5% for sawlogs and 3.9% for small roundwood.

Revisions policy

Our [revisions policy](#) sets out how revisions and errors to these statistics are dealt with.

Further information

Accompanying tables to this release, providing longer time series and the underlying data used to produce the indices, are available on the [Timber Price Indices page](#) of our website.

Annual percentage changes quoted in this release are based on unrounded figures.

Release schedule

Timber Price Indices are published every six months, in May for data to end March and in November for data to end September. The next editions will be released on the following dates:

- Timber Price Indices (data to March 2023) will be released on 18 May 2023.
- Timber Price Indices (data to September 2023) will be released on 16 November 2023.
