The Research Agency of the
Forestry Commission

Forest Research is the Research Agency of the Forestry Commission and is the leading UK organisation engaged in forestry and tree related research.

The Agency aims to support and enhance forestry and its role in sustainable development by providing innovative, high quality scientific research, data, technical support and consultancy services.

3.8 Origin of wood imports	25

Introduction

This chapter contains information about UK imports and exports of wood products, and about the level of apparent consumption estimated from data for UK production, imports and exports.

Most information on imports and exports come from [the Overseas Trade Statistics compiled by HM Revenue & Customs](#). Estimates are provided at a UK level only. International comparisons of apparent consumption are provided later in the International Forestry chapter. Further information on the data sources and methodology used to compile the figures is provided in Chapter 10: Sources and Methodology.

Figures for 2024 were previously published in [UK Wood Production and Trade: provisional figures](#), released on 22 May 2025. Some figures for 2024 and earlier years have been revised from those previously published. For further details on revisions, see the Trade section of Chapter 10: Sources and Methodology.

Figures in tables have been independently rounded, so may not add to the totals shown. Percentage changes quoted in this release are based on unrounded figures.

Key findings

The main findings are:

UK imports:

- 6.3 million cubic metres of sawnwood in 2024, a 2% increase from 2023;
- 3.1 million cubic metres of wood-based panels in 2024, a 2% decrease from 2023;
- 9.3 million tonnes of wood pellets in 2024, a 46% increase from 2023;
- 5.1 million tonnes of pulp and paper in 2024, an 8% increase from 2023.
- The total value of wood product imports in 2024 was £9.2 billion, representing a 2% increase from 2023; of which £4.3 billion was pulp and paper.
- Sawn softwood, sawn hardwood, particleboard, fibreboard, and paper and paperboard were mainly imported from EU countries in 2024.
- The vast majority of UK imports of plywood and wood pellets came from countries outside the EU in 2024.
- Apparent consumption of wood in the UK was 48.5 million cubic metres Wood Raw Material Equivalent underbark in 2024, representing a 14% increase from the previous year.

UK exports:

- The total value of wood product exports in 2024 was £1.8 billion, a 1% increase from 2023; of which £1.5 billion was pulp and paper.

3.1 Apparent consumption of wood in the UK

Apparent consumption is the amount of timber used as wood and wood products by people and industries in the UK. It is calculated as total domestic production plus imports, minus exports. Apparent consumption differs from actual consumption by the extent of changes in the level of stocks. It is not practical to collect information on actual consumption.

As Table 3.1 covers a broad range of products (including secondary processed wood products), volumes are expressed in Wood Raw Material Equivalent (WRME) underbark. WRME volumes represent the amount of wood that would have been required to make the product.

UK production of roundwood totalled 10.1 million cubic metres WRME underbark in 2024 (Table 3.1). A further 42.5 million cubic metres WRME underbark of wood and wood products were imported to the UK and 4.0 million cubic metres WRME underbark were exported, giving an apparent consumption of 48.5 million cubic metres WRME underbark. This represented a 14% increase in apparent consumption from the previous year. These figures exclude recycled wood and recovered paper (see Table 3.3 for statistics on recovered paper).

Based on the conversion factors in Section 10.10.1 of Chapter 10 to convert imports to WRME underbark, imports accounted for 81% of all wood (production and imports) in the UK in 2024.

Table 3.1 Apparent consumption of wood¹, UK, 2015 to 2024

million cubic metres WRME underbark

Year	UK production ²	Imports	Exports	Apparent consumption
2015	10.6	49.3	4.1	55.8
2016	10.8	49.6	3.8	56.5
2017	10.9	50.3	4.2	57.0
2018	11.2	49.1	3.9	56.4
2019	10.8	48.4	4.0	55.2
2020	10.5	48.0	3.6	54.8
2021	10.9	46.9	4.7	53.1
2022	9.8	43.1	4.5	48.3
2023	9.5	37.4	4.5	42.5
2024	10.1	42.5	4.0	48.5

Source: Industry surveys (Forest Research), industry associations, UK overseas trade statistics (HM Revenue & Customs) and conversion factors to Wood Raw Material Equivalent (WRME).

Notes:

1. Excludes recycled wood and recovered paper.
2. UK production of roundwood is estimated from deliveries to wood processing industries and others, as in Tables 2.5 and 2.6.

Figure 3.1 Apparent consumption of wood^{1,2}, UK, 1994 to 2024

million cubic metres WRME underbark

Source: Industry surveys (Forest Research), industry associations, UK overseas trade statistics (HM Revenue & Customs) and conversion factors to Wood Raw Material Equivalent (WRME).

Notes:

1. Excludes recycled wood and recovered paper.
2. UK production of roundwood is estimated from deliveries to wood processing industries and others, as in Tables 2.5 and 2.6.

3.2 Apparent consumption of wood products in the UK

Table 3.2 provides volumes of UK production, trade and apparent consumption in selected wood products. It differs from Table 3.1 in terms of both coverage (Table 3.1 covers a wider range of wood and wood products, including secondary processed products) and in terms of units (Wood Raw Material Equivalents (WRME) in Table 3.1, volumes of product in Table 3.2). UK production accounted for 34% of the UK sawnwood market, 48% of the UK wood-based panel market and 53% of the UK paper market in 2024 (Table 3.2).

Table 3.2 Apparent consumption of wood products^{1,2,3}, UK, 2024

thousand cubic metres, except thousand tonnes for paper and paperboard

Product	UK production	Imports	Exports	Apparent consumption
Sawnwood, coniferous	3,151	5,815	215	8,751
Sawnwood, non-coniferous	39	498	22	515

Source: Industry surveys (Forest Research), industry associations, UK overseas trade statistics (HM Revenue & Customs).

Notes:

1. Excludes other wood products, e.g. fuelwood and round fencing.
2. Excludes roundwood and intermediate products (e.g. sawmill products, pulp and recovered paper) to avoid double-counting.
3. Includes sleepers.

3.3 Flow of recovered paper

UK production of recovered paper (the amount recovered from businesses and households in the UK) totalled 6.3 million tonnes in 2024 (Table 3.3), a 2% decrease from 2023. Imports increased by 18% and exports decreased by 4% between 2023 and 2024, resulting in a 3% increase in apparent consumption over this period.

Table 3.3 Flow of recovered paper, UK, 2015 to 2024

thousand tonnes

Notes:

1. Apparent consumption of recovered paper refers to use of recycled paper pulp in the UK.

3.4 UK import quantities by product

Wood imports to the UK in 2024 included 6.3 million cubic metres of sawnwood (a 2% increase from the previous year), 3.1 million cubic metres of wood-based panels (a 2% decrease), 9.3 million tonnes of wood pellets (a 46% increase) and 5.1 million tonnes of pulp and paper (an 8% increase) (Table 3.4a).

Notes:

1. There are reliability concerns for some of these figures, particularly for individual products (see Chapter 10: Sources and Methodology).
2. Sawnwood includes sleepers from 2017.
3. Includes veneer sheets.
4. Includes roundwood, wood charcoal, chips, particles, residues and from 2017, includes recovered wood.

Paper accounted for the majority of pulp and paper imports, with a total of 4.2 million tonnes imported in 2024 (Table 3.4b). This represented an 8% increase from the previous year.

Table 3.4b Import quantities, UK, 2015 to 2024¹: Pulp and paper

thousand tonnes

Year	Paper	Pulp	Recovered paper	Total

Notes:

1. There are reliability concerns for some of these figures, particularly for individual products (see Chapter 10: Sources and Methodology).

3.5 UK export quantities by product

A total of 4.5 million tonnes of pulp and paper (including recovered paper) was exported from the UK in 2024 (Table 3.5a), representing a 3% decrease from 2023.

Table 3.5a Export quantities, UK, 2015 to 2024¹

thousand cubic metres, except thousand tonnes for 'Wood pellets' and 'Pulp and paper'

Year	Sawnwood ²	Wood-based panels ³	Other wood ⁴	Wood pellets	Pulp and paper ⁵

Notes:

1. There are reliability concerns for some of these figures, particularly for individual products (see Chapter 10: Sources and Methodology).

3.6 UK import values by product

Wood product imports in 2024 were valued at a total of £9.2 billion, a 2% increase from 2023 (Table 3.6a). Pulp and paper (including recovered paper) accounted for 46% of the total import value in 2024. Sawnwood imports were valued at £1.8 billion in 2024, wood-based panels at £1.2 billion and wood pellets at £1.7 billion.

The import values presented in this section are actual prices at the time of sale.

Table 3.6a Import values, UK, 2015 to 2024¹

£ million

Year	Sawnwood ²	Wood-based panels ³	Other wood ⁴	Wood pellets	Pulp and paper ⁵	Total
2015	1,311	957	88	780	4,375	7,510
2016	1,423	1,010	85	915	4,003	7,436
2017	1,636	962	90	961	3,998	7,647
2018	1,743	1,201	75	1,117	4,075	8,210
2019	1,598	1,134	97	1,309	4,076	8,214

3.7 UK export values by product

Wood product exports from the UK were valued at a total of £1.8 billion in 2024, a 1% increase from the 2023 total (Table 3.7a). Total exports of wood products in 2024 comprised 83% pulp and paper, 8% wood-based panels, and 3% other wood.

The export values presented in this section are actual prices at the time of sale.

Table 3.7a Export values, UK, 2015 to 2024¹

£ million

Year	Sawnwood ²	Wood-based panels ³	Other wood ⁴	Wood pellets	Pulp and paper ⁵	Total
2015	44	75	35	1	1,441	1,597

Notes:

1. There are reliability concerns for some of these figures, particularly for individual products (see Chapter 10: Sources and Methodology).
2. Sawnwood includes sleepers from 2017.
3. Includes veneer sheets.
4. Includes roundwood, wood charcoal, chips, particles, residues and from 2017, includes recovered wood.
5. Further details of pulp and paper export values are provided in Table 3.7b.

Paper exports were valued at £0.9 billion in 2024, accounting for 59% of all pulp and paper exports (Table 3.7b).

Table 3.7b Export values, UK, 2015 to 2024¹: Pulp and paper

£ million

Notes:

1. There are reliability concerns for some of these figures, particularly for individual products (see Chapter 10: Sources and Methodology).

3.8 Origin of wood imports

Table 3.8 presents data on the source of selected wood products that have been imported into the UK in 2024.

Sawn softwood, sawn hardwood, particleboard, fibreboard, and paper and paperboard were mainly imported from EU countries in 2024 (Table 3.8):

- Sweden (37%), Ireland (20%) and Latvia (17%) provided the majority of imports of sawn softwood to the UK.
- France (17%) and Latvia (15%) provided almost a third of the sawn hardwood imported to the UK.
- Most particleboard imports to the UK came from Germany (17%), Ireland (17%) and France (14%).
- Most fibreboard imports to the UK came from Ireland (36%) and Germany (16%).
- Most paper and paperboard imports came from Sweden (16%), Germany (15%) and Finland (11%).

Wood pulp imports originated from a range of both EU and non-EU countries in 2024:

- Brazil (39%) and Sweden (27%) provided most of the wood pulp imports to the UK.

The vast majority of UK imports of plywood and wood pellets came from countries outside the EU in 2024:

- China (53%) and Brazil (17%) were the principal sources of plywood imports to the UK.
- United States of America (74%) and Latvia (10%) provided the majority of wood pellet imports to the UK.

Source: UK overseas trade statistics (HM Revenue & Customs).

Notes:

1. Sawnwood imports in this table exclude sleepers.

Figure 3.2 shows the main sources of imports of sawn softwood to the UK since 1962. The total level of sawn softwood imports has fluctuated between around 5 million cubic metres and 10 million cubic metres from 1962 to present. Imports to the UK from Canada have reduced substantially since the early 1990s. In contrast, imports from the Baltic States increased between 1992 and 2003 and, although there was some decline between 2003 to 2012, imports from the Baltic States to the UK have started to increase again in recent years. Since 1993, Sweden has consistently been the principal country of origin for UK sawn softwood imports.

Figure 3.2 Country of origin of sawn softwood imports to the UK, 1962 to 2024

million cubic metres
